Residence of M. H. Gaar, Landscape Architect, and Entrance to Nursery Grounds

GAAR NURSERIES Capital Hill, Cambridge City, Indiana

M. H. Gaar, Expert Landscape Architect and Nurseryman, of Cambridge City, Ind., presents this circular to you for the spring of 1924, the planting season—March, April and May—and gives you a special invitation to come in your automobile to the nursery during these months and see what you buy. When you make your own selection you get exactly what you want, and when you take it home fresh from the nursery, and set it out at once, it will all grow. If you can't come, send your order and we will deliver it to your door by truck in fine condition.

We have experienced a rapid growth in the past few years in our Landscape Department. M. H. Gaar and his assistants have in the past few years designed and landscaped hundreds of beautiful places throughout eastern Indiana. The demand for our service is gradually increasing and we are now equipped to handle this work better than ever before. This service of laying out, designing and landscaping is rendered gladly by us, free of charge. If you want a drawing made, send for one of our landscape artists, who will come to your grounds and make you a complete drawing free of charge. He will tell you what to use, where and how to set it and what the material will cost to decorate it to make it beautiful. To meet the greater demands of our business and to give proper service, large cellars and packing sheds have been built which we use enabling all customers to receive prompt attention and their orders delivered in first class condition of the best grade of nursery stock you ever saw. Come, be convinced and see what you buy.

Our nursery is your nome nursery and we suggest you ask our customers about us. Please do this, flund-

Our nursery is your nome nursery and we suggest you ask our customers about us. Please do this. Hundreds of people come in their autos to the nursery in March, April and May in the spring, and October, November and December in the fall and make their own selections.

The prices given on stock in these lists are for our No. 1 selected stock. We always have lower prices for smaller stock, owing to the grades. Small or second grade stock on many items run as low as 10 and 15 cents, but we advise all to buy the best, as it always gives better results for you and the nurseryman.

If it is impossible for you to come to the nursery, study this list carefully, select what you want and write the items down on the order blank on the back of this circular; send it to the Gaar Nurseries and we will send the nursery stock to you, subject to being examined thoroughly before sending us any money. Is not that fair? If anything is not perfectly satisfactory, report it at once to us and it will be made right. All stock which is unsatisfactory must be reported within 5 days after it is in your possession. Nothing will be replaced or made good after that time expires.

When you take it home and set it out all nursery stock must be mulched by putting rotten straw or manure on top of the ground 4 to 6 inches deep and 2 feet around the plants or trees and kept there all summer. This mulch keeps the ground moist and cool, giving the small white roots a chance to grow. If anything dies after being mulched as soon as it is set out we will replace it at one-half price. If it is not mulched as we advise in this circular and anything dies it will not be replaced as it will not be our fault, but yours. Everything must be mulched to be guaranteed.
